

134-1000  
Angles of vision

Angles of vision  
Skewed like our dreams  
Nothing is ever  
Quite what it seems  
Angles of vision  
A social curse  
What we see as normal  
You call perverse

Angles of vision  
Filters abound  
Nary a truth  
Can e'er be found  
Angles of vision  
Like beams of light  
Still have an impact  
Well Beyond sight

The trick is not to believe what you see is always true  
Carefully consider all you see and what you do  
Reality refracted is not reality at all  
If we're not careful we will ignorant walk headlong into a wall
