

893-1000

I spent some time on earth

I spent some time on earth
So much beauty, so much pain
I traveled round the continents
I witnessed the horror of men
I sat atop a mountain
And watched the climbers con'qring smiles
And littered with their refuse
The mountain they must sure revile
I sailed the seven seas
And landed on a island thus
And found it made of garbage
And not one man would make a fuss
I walked the streets at early dawn
The homeless shivering on the street
A billionaire strolled quietly by
Another silent night defeat
I spent some time on earth
And decided it was not for me
And spinning round the universe
I wonder if that planet will e'er be free
