

180-1000  
Tell me about it

You don't have to rail against the things we see as broken  
The bills are piling up, on our debts we all are chokin  
Sometimes i wonder why i quit, maybe i should be smokin  
Tell me about it

You don't have to remind me that our species is a mess  
Sometimes i pray the asteroid would end us, i confess  
When it gets real bad i find that about it all i do is obsess  
Tell me about it

The lying and the cheating are the way we get along  
Guided by self-interest, the weak are oppressed by the strong  
Funny how we still claim that such actions are wrong  
Tell me about it

In every corner of the earth the depth of our depravity  
Is visible to all who are willing to truly see  
Just take the plight of each child who we call a refugee  
Tell me about it

The problem with this song is i have no solution to provide  
I suppose each individual will have to decide  
Whether they will embrace their brothers or in conflict they'll collide  
Tell me about it

Go ahead  
Tell me about it  
Tell me something i don't know  
Preach to me  
Set me free
