

288-1000
They tricked us

They tricked us, the knew it along
It's pretty clear that deep down they understand right from wrong
But they act without conscience, appealing to the throng
They tricked us

They tricked us, with their patriotic claims
If we didn't agree with them they called us filthy names
For us the world is real and for them it's a bunch of games
They tricked us

They tricked us, told us they were on our side
And so trusting in their truthfulness in them we did confide
And not in folsom prison most of us reside
They tricked us

They tricked us, and now we're on the run
Better than staring down the barrel, wrong end of the gun
200 years of freedom is all just a setting sun
They tricked us

Trick or treat
Coup complete
Freedom gone
Ban that song
Ban that song
