

WITH ME #3 of 1000 songs

I carry a lifetime of regrets (G, Em, C, D) with me (G)
I look up even though I don't believe
in thee
I know the sun always shines above the clouds (C, D, G, Em)
even when the gray all emotion shrouds
I'm running solo even when the crowd's
with me (C) with me (D)

Will you come through the darkest dawn, with me
I can't promise a smile every morn
you see
For me joy takes work to realize
I'm not asking that you empathize
only that you not fall for my disguise when you're
with me with me

my little girl i wish you were still here with me
perhaps i'd croon a different melody
be free
yet the truth remains here by my side
for over half a century i've lied
and sorrowful, i wish that you had died
with me with me

of course you can leave when it's time (Bm, C)
i'll fare thee well and supply the dime
when you call you know i'll be doing fine
