

500-1000
You are not forgotten

You are not forgotten, precious one
Each morning you rise with the hot summer sun
Every waterfall cascade calls out your name
We hear your laughter in the afternoon rain

You are not forgotten, little girl
You are all of the good that occurs in this world
When e'er this land over a person is kind
Tis your spirit dancing we're sure to remind

You are not forgotten, oh timeless soul
Its your Memories carried that make us feel whole
And better we are because you in our heart
Tells us from love's sweet embrace we are never apart

You are not forgotten, for you are forever
Like winds that in time create long hidden treasure
Under sands that exist in a deserts far reach
There is nothing to know and there is nothing to teach

For unlike the garden who with winter recedes
And decades unspoken becomes covered in weeds
Each day we look up and say as the sun sets
That we love you forever and we never forget

For The most precious of children who e'er walked on this earth
each altered our paths from the moment of birth
And while we may not see you in somewheres tomorrow
And while each day your passing still soaks us in sorrow

You are not forgotten, and we never will
For love never dies even when all else is still
You are not forgotten, and never will be
For you are the spirit that sets our souls free
